What Challenges Does Business Face?

Late Manager Response

Customers wait too long and switch to competitors.

Low Conversion

High interest, but a low rate of turning interest into sales.

Increased Workload

Managers cannot handle all inquiries.

Lack of Customer Qualification System

All inquiries land in one place, no order.

How Does FlexAI Solve These Problems?

AI-Bot Responds 24/7

Provides customer service at any time.

Automatic Customer Qualification

Only "hot" leads are passed to managers.

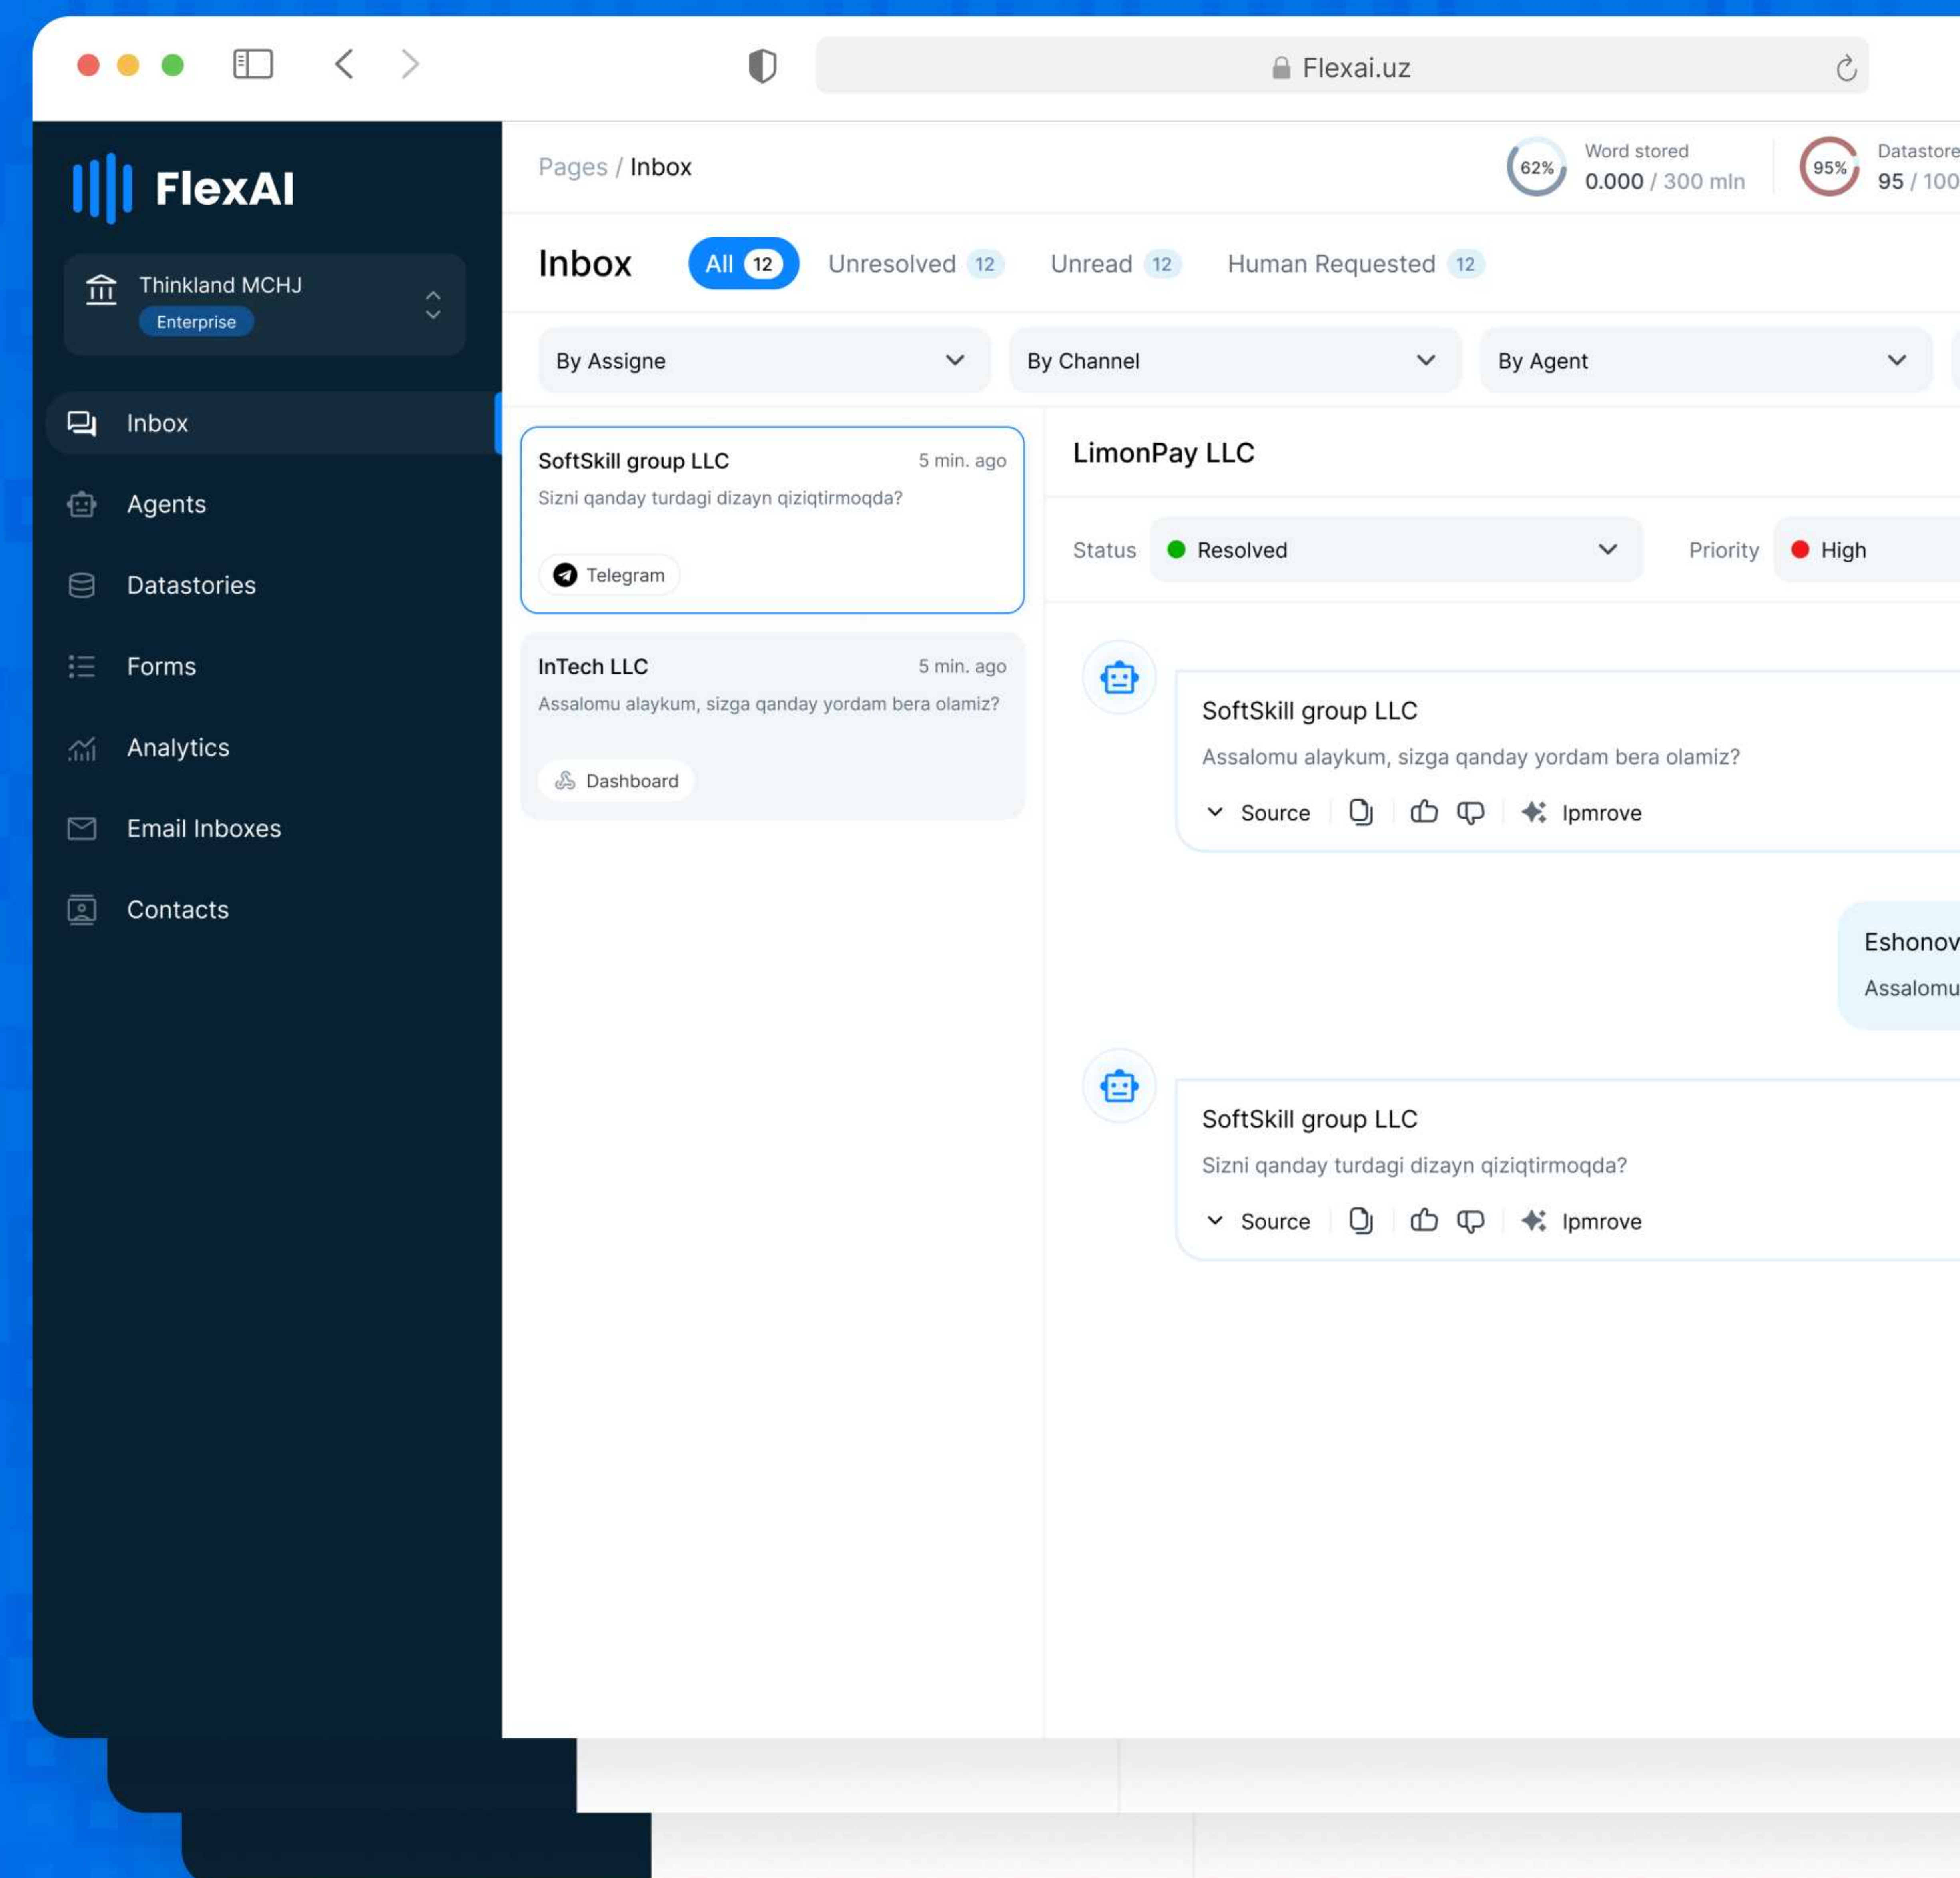

Sales and Support Automation

The bot provides quick answers, accepts orders, and sends reminders.

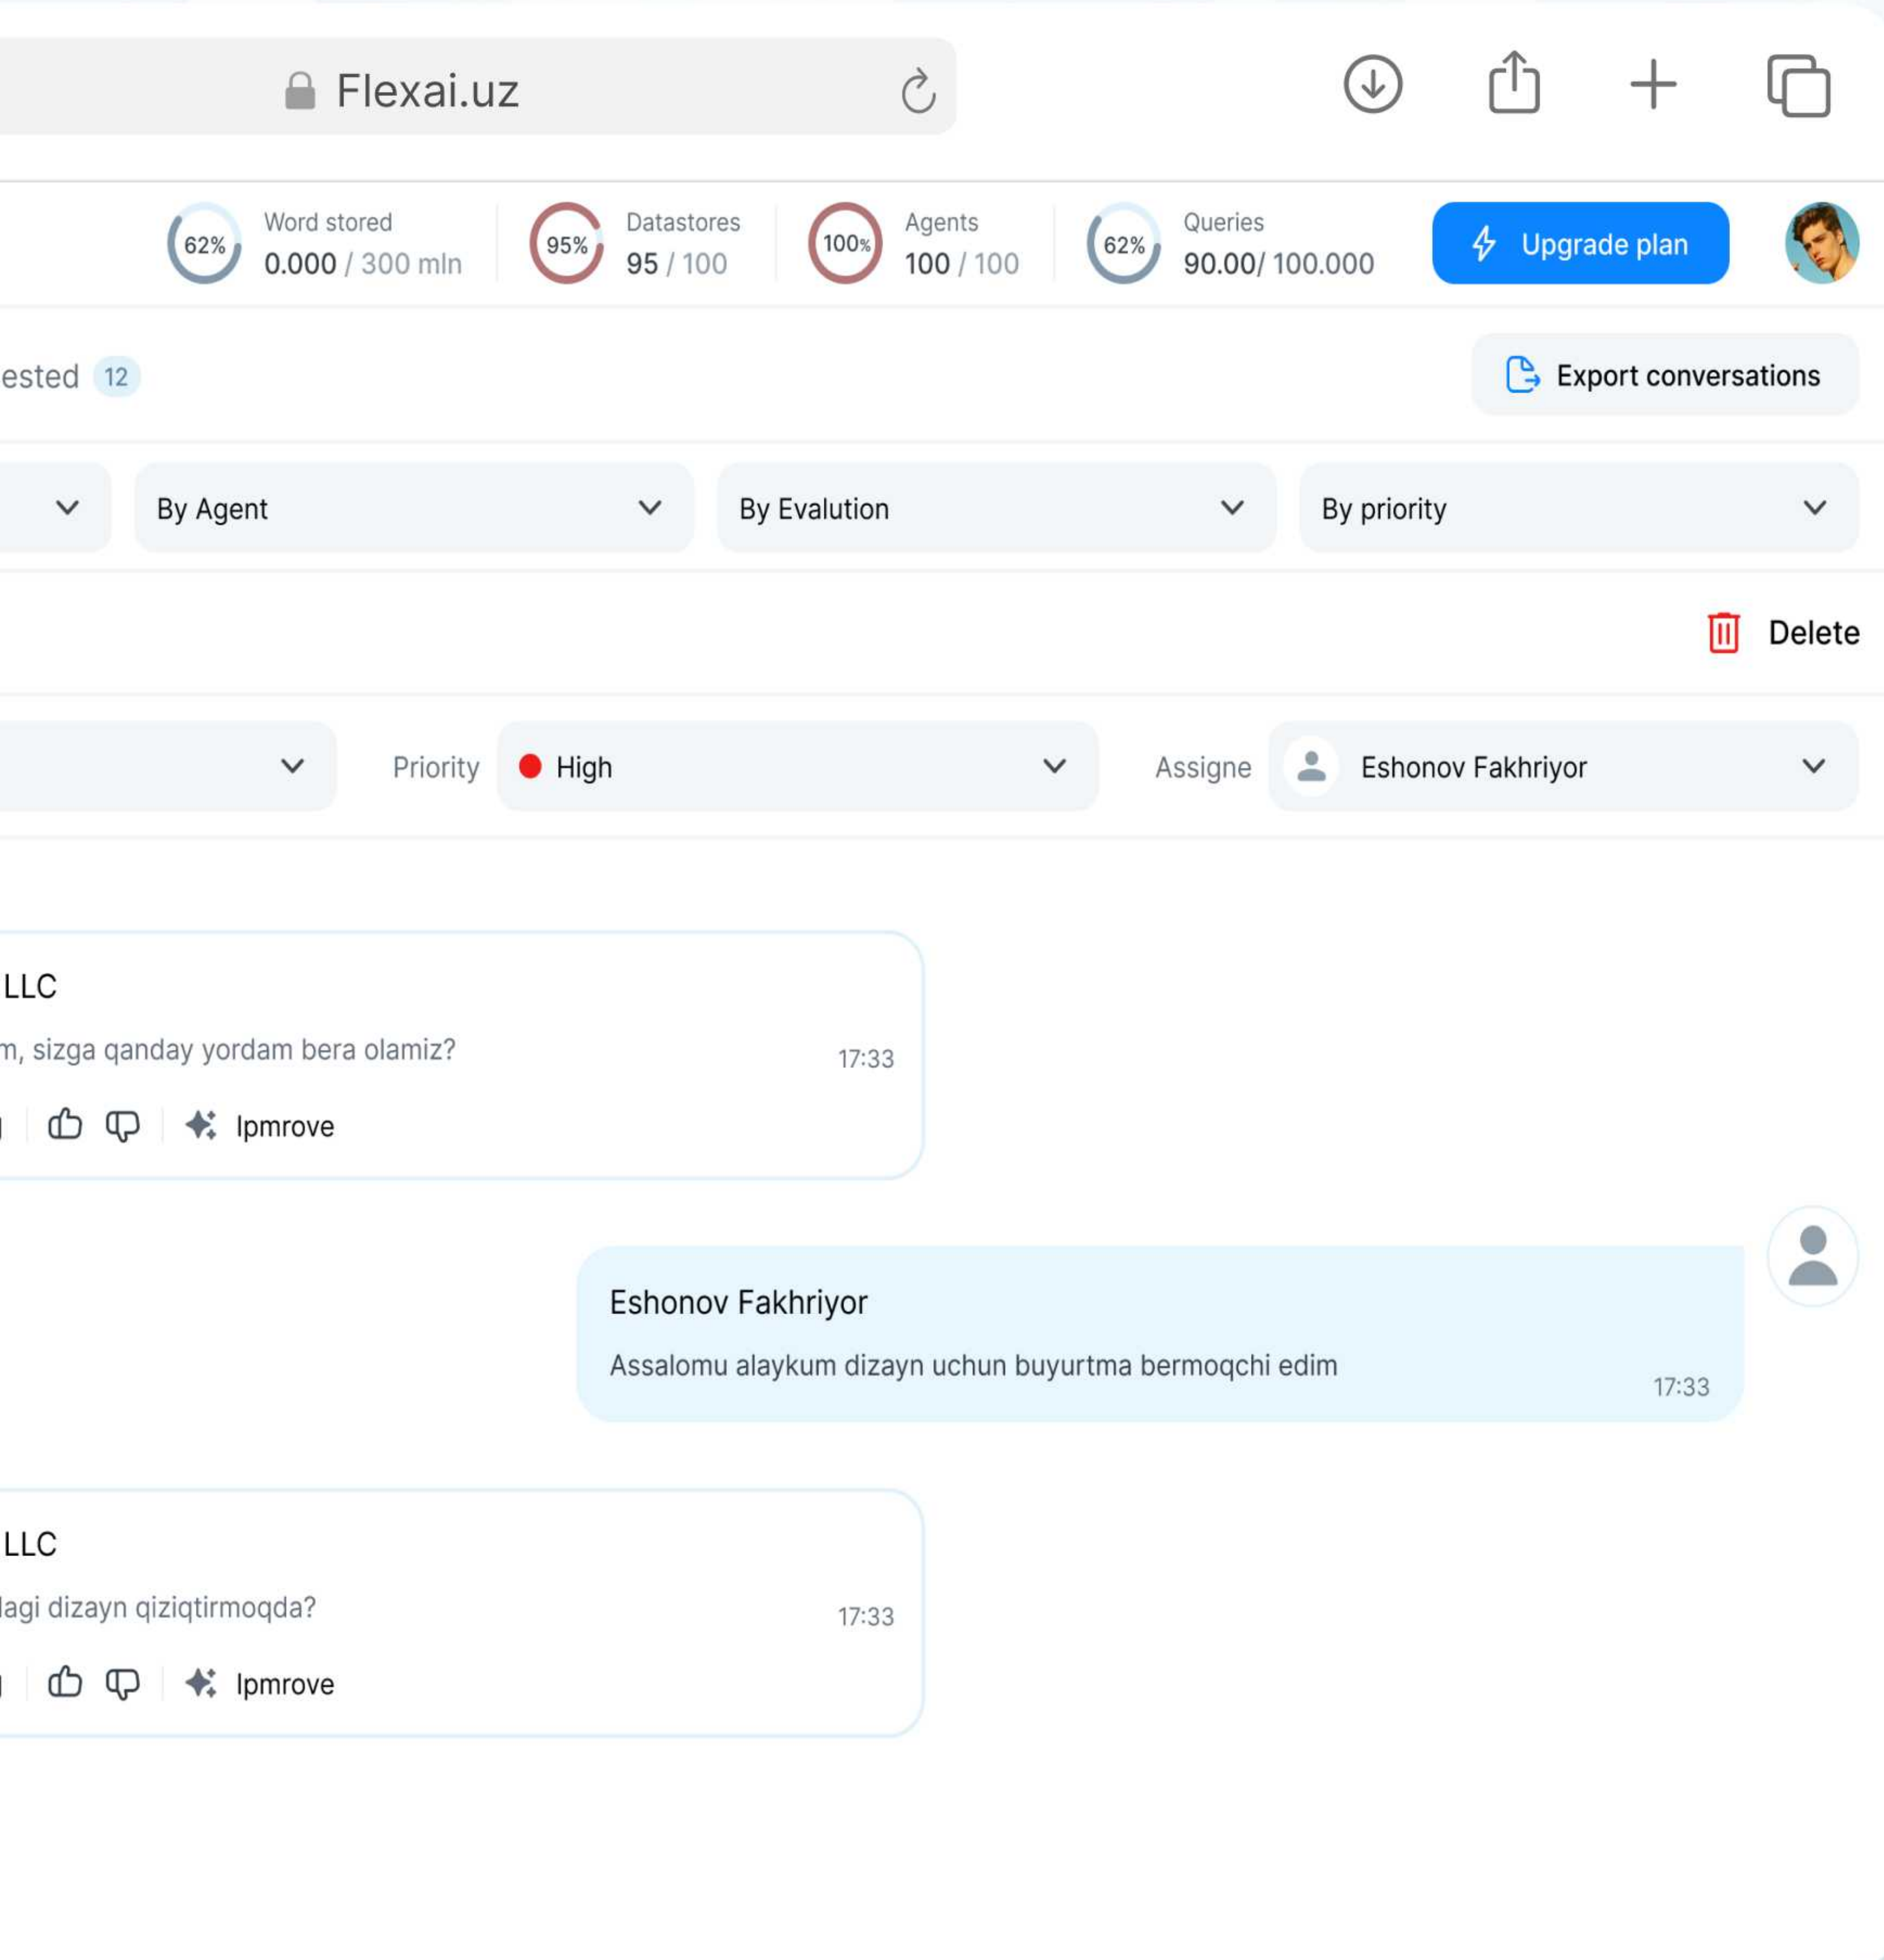

Integration with Popular Platforms

Works with Telegram, WhatsApp, Instagram, and CRM systems.

How Does FlexAI Work?

Customer Starts the Conversation

Writes via Telegram, WhatsApp, or Instagram.

AI-Bot Answers the Question and Determines the Need.

Hot Leads are Directed to the Manager,
"cold" leads are given automatic information.

The Manager Only Works with Real Buyers, saving time.

All Processes are Monitored, and analytics are provided for the business.

Who Is It Suitable For?

Online Stores

Accepting orders, customer service.

Banks and Insurance Companies

Customer qualification, consultation.

Educational Platforms

Enrollment in courses, reminders.

Businesses with Social Media Presence

Customer attraction, quick Q&A.

Financial Benefits

Salary Savings

Managers work only with real customers.

Increased Sales

Opportunity to work with every qualified lead.

Time Savings

Quick responses and automated processes.

Results Monitoring

The AI-bot's efficiency is precisely calculated.

Why FlexAI?

Fast Launch

Setup without coding, can be used in 1 day.

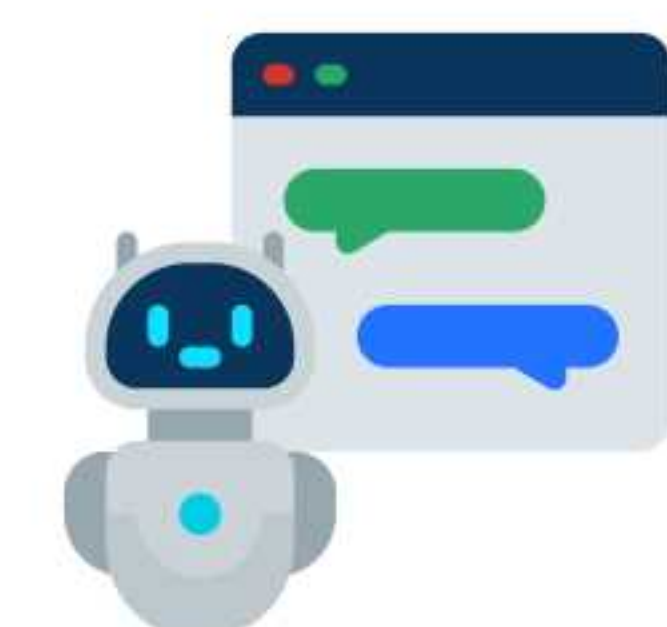

Works with Popular Platforms

Telegram, WhatsApp, Instagram.

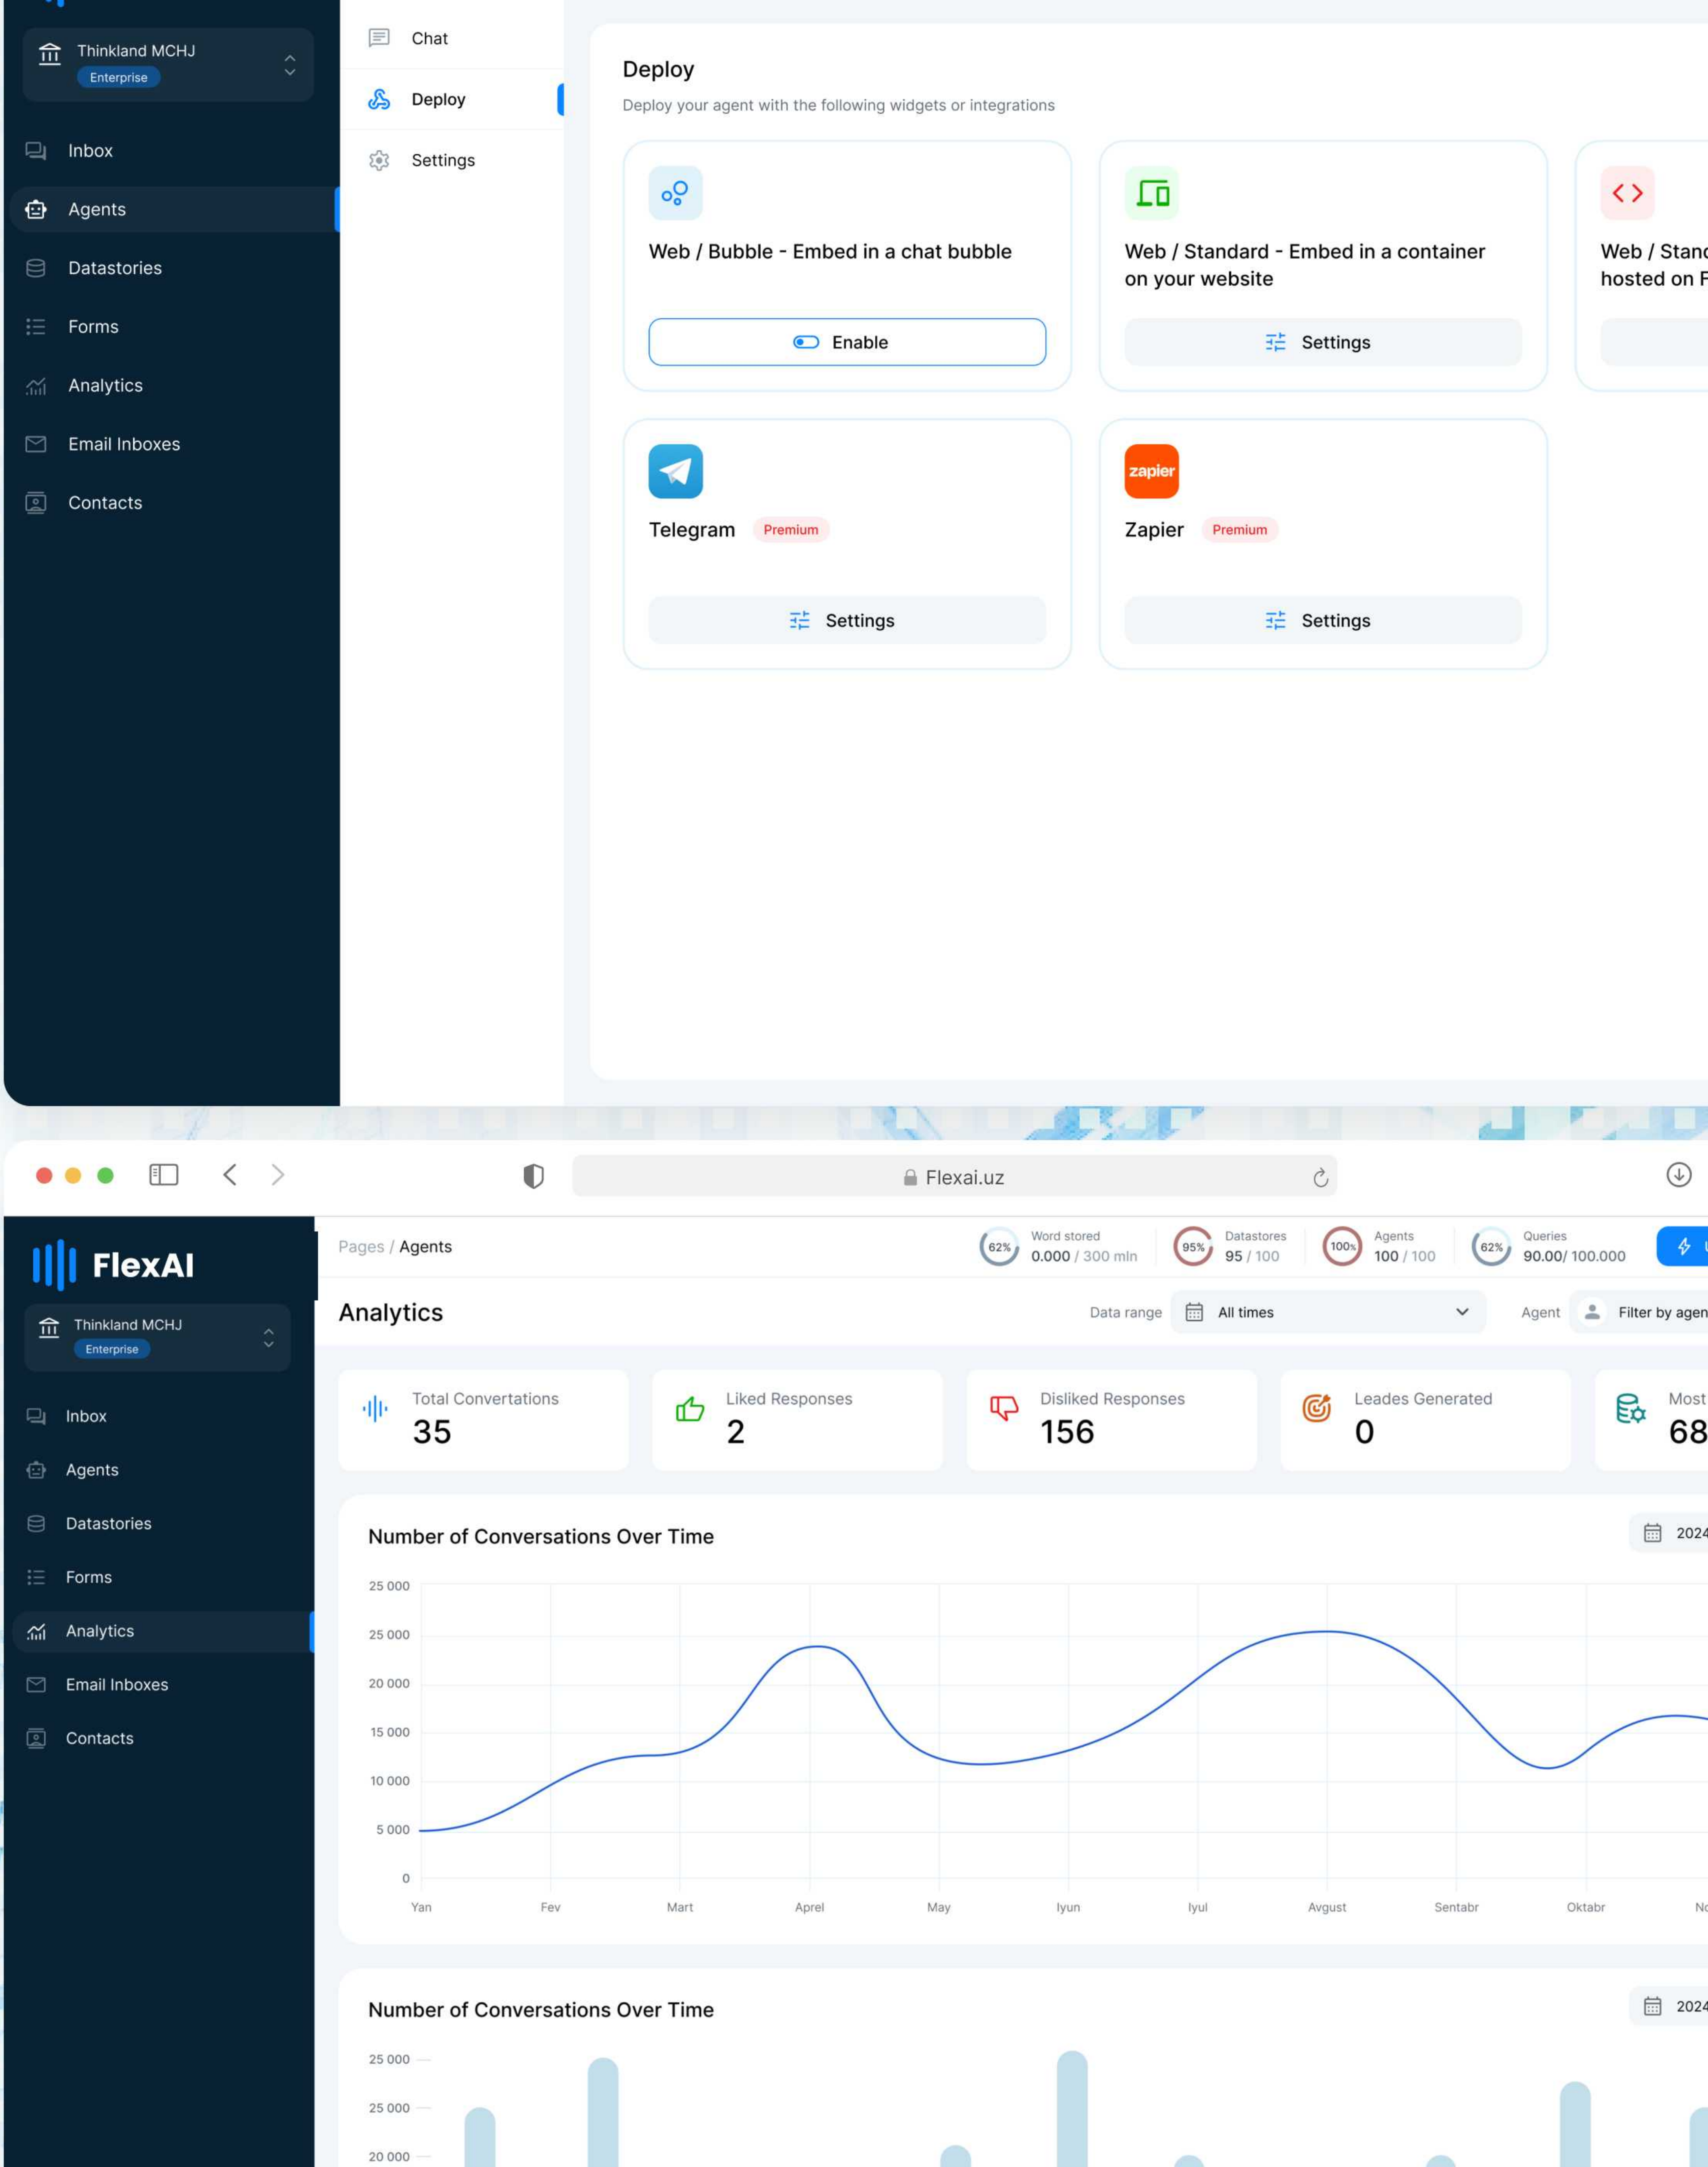

Accurate Analytics and Reports

Customer behavior and sales effectiveness are monitored.

Artificial Intelligence Adaptability

Learns and develops according to your business needs.
